Professional Summary

Software Engineer with 3+ years of experience building fast, scalable, and user-centric web applications using the MERN stack. Delivered responsive UI components and optimized APIs, reduced average load time, and boosted user engagement. Proficient in translating product requirements into clean, maintainable code and collaborating with cross-functional teams.

Technical Skills

Frontend: ReactJS, React Native, Redux, JavaScript (ES6+), HTML5, CSS3, TailwindCSS, Material UI, Bootstrap, PrimeReact, Next.js, TypeScript, and React Testing Library.
Backend: NodeJS, ExpressJS, MongoDB, Firebase, RESTful APIs.
Tools: Jest, VSCode, Git, Postman, WebSocket, Lighthouse, WebPageTest.

Work Experience

Software Engineer - Coffeeweb Technologies Private Limited

July 2023 - Present

- Refactored and optimized complex ReactJS codebases for user and admin panels, improving rendering speed by 60% and enhancing long-term maintainability across the development team.
- Reduced 50+ redundant API calls, streamlining frontend-backend communication and improving overall application performance and load time.
- Led cross-functional collaboration with designers, product managers, and backend engineers to deliver 10+ scalable features, accelerating delivery timelines and ensuring product-market alignment.
- Achieved 75% test coverage across 50+ React components using Jest, establishing robust testing practices and reducing production-level bugs by a significant margin.
- Enabled multilingual support for 5+ languages and authored 50+ pages of technical documentation, improving global accessibility and reducing onboarding time for new developers.
- Boosted app performance and user experience by implementing lazy loading, infinite scrolling, and responsive design across devices.
- Built and integrated a payment and reconciliation module, reducing payment discrepancies and enhancing financial audit accuracy.

Frontend Developer - iLearnplace

May 2022 - July 2023

- Developed 15+ responsive pages using Material UI, increasing mobile responsiveness by 30%.
- Built 10+ reusable components, reducing development time for future features by 25%.
- Mentored 3+ interns, improving team productivity by 20%.
- Resolved 50+ bugs, significantly improving application stability.
- Integrated REST APIs to keep data updated and the interface interactive.

Personal Project

Share - Me

Share-me is an image-sharing app that lets users search and upload images by category. Tech Stack : ReactJS, TailwindCSS, and, Sanity

Chat-App

Developed a real-time chat application with messaging, user authentication, and responsive design. Tech Stack: ReactJS, TailwindCSS, Zustand, Node.js, ExpressJs, MongoDb, DaisyUi, Socket.io
